

Dear Editor,

This paper proposed a new field titled 'Artificial Human Optimization'. This paper shows how to propose a new field which has less number of papers published under it.

This paper is a new kind of paper where abstracts are collected and showed as it is in an attempt to propose a new field.

Kindly accept this innovative paper.

People will call me 'Founder of Artificial Human Optimization field' with this paper.

Please keep this thing in mind while taking final decision.

Thank you!

Yours Truly,

Satish Gajawada.
